

I.LIFE

A STEP AWAY FROM ORDINARY.

Pure and uncomplicated, *i.life* is the expression of you.

A collection that looks ahead to a future where the possibilities feel endless. In creating *i.life*, Ideal Standard has crafted three ranges, each with their own design character and technical features, but all with the same spirit and energy.

These are simple geometric shapes combined with gentle curves, flowing across a varied range that lets you celebrate what makes you different. Built to last and engineered to perfection, a bathroom from Ideal Standard functions without fuss so you can relax in your home or go out and enjoy life. A collection, created by the multi-award-winning Palomba Serafini Associati studio, that feels accessible and optimistic.

i.life creates a space which quietly inspires, where everything is inclusive and within reach.

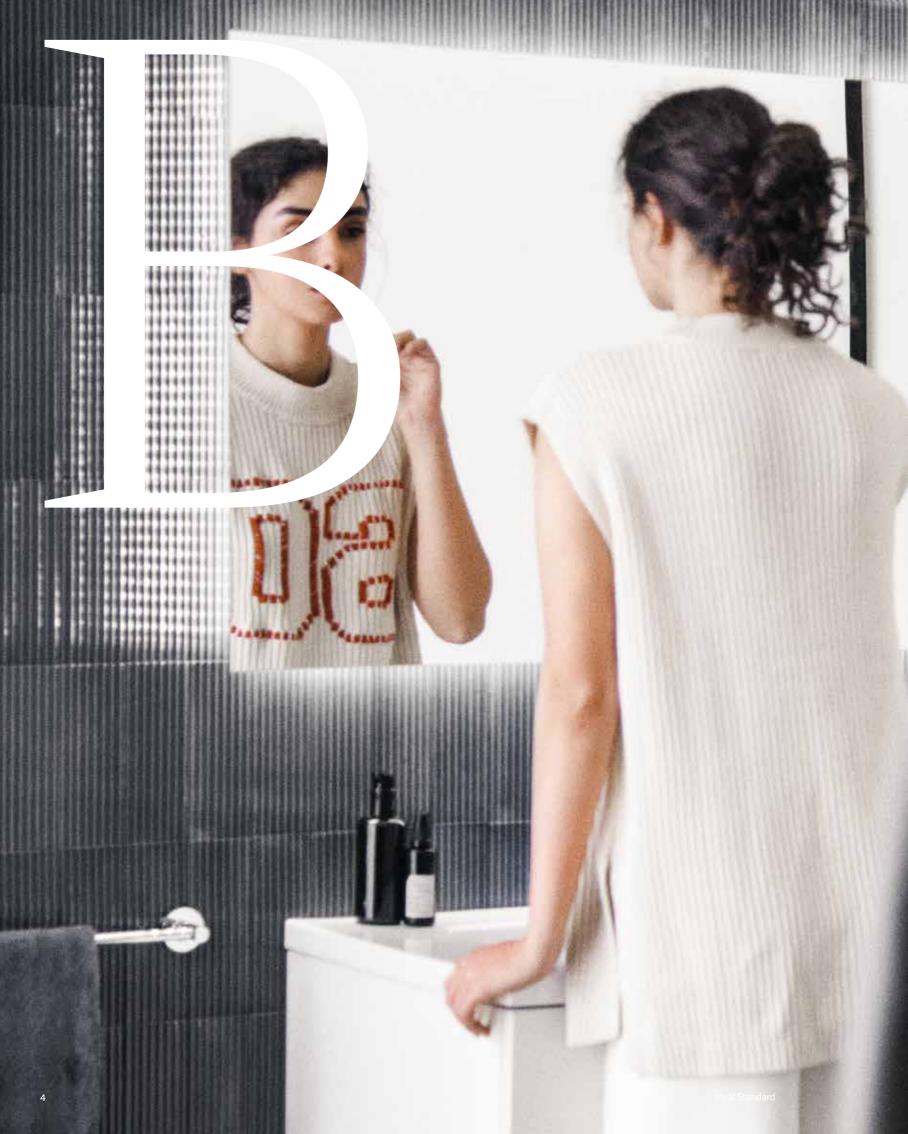

I.LIFE B WHERE LIFE JUST FLOWS

i.life B has a contemporary minimalism which is softened by gentle curves and flowing lines.
This design aesthetic is reflected throughout a basin range with solutions to suit every shape and size of space, whether it's a family bathroom or a compact cloakroom. Choices span from the larger 80cm basin to the 35cm handrinse basin, with semi-countertop, vanity and corner versions also available.
This is where busy days begin and end. A place to look ahead to experiences yet to come and think back to good times with family and friends.

Vanity units are available in a choice of heights, with one and two-drawer options, all with soft closing to give a feel of quiet luxury. This is the archetype of light design, where simplicity meets creativity and the results are elegant and effortless.

FirmaFlow®

Engineered to last.

We pioneered the ceramic disc cartridge in 1969. This innovation redefined the way people used bathrooms and made it possible to create the single lever tap.

As the ultimate development of the original ceramic disc cartridge, some 50 years on, FirmaFlow® is the undisputed market leader. With its innovative engineering and extraordinary powers of durability, comfort and control are achieved for twice as long as the industry standard.
