

THE STORY BEHIND THE TECHNOLOGY

Design is at the heart of everything we do. This means our products are at the foremost edge of design thinking for both functionality and style.

"Our objective was to create a sleek, modern design that outperforms existing toilets on the market. We designed the bowl without the traditional overhanging rim to give a contemporary look and feel. This also reduces unhygienic areas which can harbour bacteria. In terms of the flush performance, we engineered the design to allow the water to wash from the very top of the bowl so that cleaning is optimised. The internal channel reduces turbulence to create a highly efficient, quieter flush with less splashing."

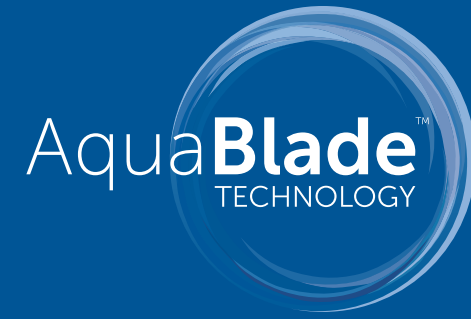

Mike Heaton
Product Development Manager
Ceramics, EMEA

"I really love the simplicity of my new toilet with AquaBlade™ Technology particularly the contemporary design.

People who have visited love the toilet and they immediately notice that there is no overhanging rim. The AquaBlade™ is a lot more powerful than other toilets and more efficient, yet it is quick and much quieter than other toilets."

Mary Cocking
AquaBlade Trialist

THE NEW STANDARD OF FLUSH PERFORMANCE

At Ideal Standard we're continually striving to bring the most beautiful, innovative solutions to our customers, leading the way and setting new standards in bathroom design.

Now, following several years in development, we're proud to introduce new Ideal Standard AquaBlade™ Technology - the most significant development since the invention of the flush toilet. We're confident that this unique, patented technology will set new standards in design, hygiene and performance.

DEA TOILET AND OUR NEW TONIC II TOILET ARE FEATURING AQUABLADE™ TECHNOLOGY

THE ULTIMATE COMBINATION OF STYLE AND PERFORMANCE

DESIGNED TO LOOK BEAUTIFUL

With simple clean lines and contemporary styling, AquaBlade™ Technology has been designed with aesthetics as well as performance in mind. There is no unsightly rim so only the smooth curves of the bowl are visible.

BETTER LOOKING...

In research, 8 out of 10 consumers* preferred the look of the AquaBlade™ Technology bowl to standard box rim.

* based on research in UK and Italy

UNRIVALLED HYGIENE

AquaBlade™ Technology outperforms all existing toilets in terms of hygiene.

Traditional toilets leave a significant area of the bowl unwashed particularly at the back of the bowl. The AquaBlade™ channel is positioned close to the top of the bowl so 100% of the surface area beneath is rinsed clean every time.

AquaBlade™ Technology is also more efficient than rimless technology. In rimless toilets, during flushing water can often splash over the bowl, causing bacterial particles to be released into the air.

With AquaBlade™ Technology, the optimised water pressure and the smooth curves of the bowl flush bacteria clean away with no unhygienic splashing.

With traditional box rimmed toilets, approximately 20% of the bowl is unwashed.

AquaBlade™ Technology ensures 100% of the surface area below the channel is rinsed clean.

EXCEPTIONAL FLUSH PERFORMANCE

AquaBlade™ Technology gives a superior flush performance every time.

With no overhanging rim, the water flows from the very top of the bowl rinsing 100% of the area beneath.

The integral channel creates a pressurised cascade of water which flows around the bowl creating two strong jets at the front. These merge to form a powerful plume of water that drives away solid matter effortlessly.

AQUABLADE™ FLUSH TECHNOLOGY IS THE BATHROOM EQUIVALENT OF THE JET ENGINE

EASIER TO CLEAN

AquaBlade™ Technology powerfully rinses the whole bowl clean with every flush and its gentle curved shape makes it easy to wipe with minimum effort.
