

Everyday water and energy saving

Save precious water and welcome a touch of steaming finesse to your bathroom. Thus, economy meets with top-quality materials and workmanship in every single masterpiece.

safety

Hot water temperature control: the built-in temperature pin ensures that you can easily and quickly reduce hot water temperature whenever you like. Just lift the red plastic ring, adjust it in one of the positions 1-7 and the handle's range of movement will be delimited, thus reducing the water maximum temperature.

Click Technology

Control the quantity of water you use with Click Technology. Thanks to its safe, environmental-friendly and economical operation, which ensures convenient and precise temperature control at any given time, you can achieve up to 50% savings in water consumption.
