Slimline ②
New, affordable
performance

More innovation, more value, more enjoyment

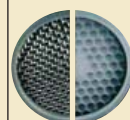

Slimline has entered a new generation. The exciting new Slimline² range offers all the original Slimline features with improved functionality, efficiency, security and ease-of-use. With all the latest innovations at a value price, it's the ultimate opportunity to update your bathroom.

High quality aerator

This stream regulator, with its unique construction, restricts limescale build-up. Even after being subjected to the ageing effects of limescale, the high performance aerators produce a straight, round, splash-free water stream.

Regular aerator with wire-mesh screen

Slimline² aerator, new high performance material screen

Simulation of limescale build up after 5 years

Bad, splashing stream

Good, aerated stream

A complete collection

Basin, bidet, shower, bath/shower, kitchen... the Slimline² collection brings you an entire range of complimentary fittings to cover every corner of your home.

Automatic diverter and noise reducers

All bath/shower exposed models (except the exposed long tubular spout mixer) are equipped with an automatic bath or shower selector, an exceptional feature for products of this price range.

 Flexible hoses G^{3/8}"
 Aerator M18X1-D20
 Metal handle with red and blue indicator
 Pull out spray chef techno
 Flexible hose for the pull-out spout

B8598AA

innovation

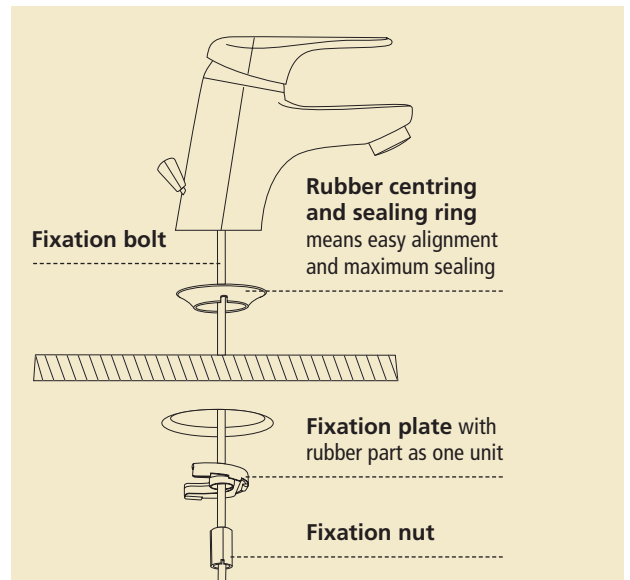

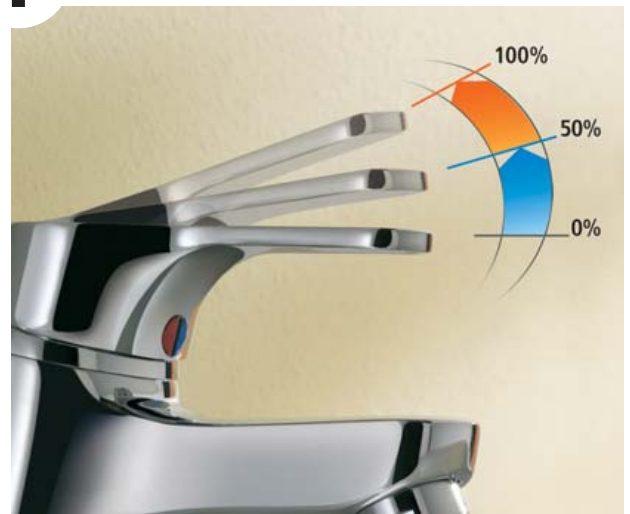

Click Technology

Safe, ecological and economical, Click Technology gives you a 50% water-saving device to help control how much water you use. And you can be sure to take pleasure in precise and comfortable temperature control at any time. (Not available on the dual control mixer).

The difficulty of centring a mixer in the tap hole of a basin is familiar to any plumber. It is time consuming and costly. The Easy-Fix System uses a single stainless steel bolt both to secure and centre the mixer automatically, in one swift move. All components come pre-assembled – so no work is required.

functionality

Easy-Fix System

The fixation plate and rubber part form one unit. A single metal bolt automatically secures and centres the mixer in one simple move.

Centring and sealing ring

The centre seal means easy alignment and maximum sealing to prevent risk of leaks. For optimal reliability, every day.
